

MEHUL JOSHI

Senior Software Engineer (Full Stack Engineer)

Gandhinagar, Gujarat, India | +91 8128753696 | joshimehul1995@gmail.com

LinkedIn: <https://www.linkedin.com/in/mehul-joshi-61a59275>

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 10 years of experience building SaaS products, enterprise applications, and mobile platforms using React.js, Angular, Next.js, Node.js, Express.js, PHP (Laravel) and React Native. Experienced in designing and optimizing high-traffic systems handling 200K+ daily transactions and 15K+ active users, improving API performance by approximately 28%, implementing microservices architecture, and leading engineering teams. Skilled in building reliable, production-ready software, solving complex performance challenges, and delivering scalable solutions across the full development lifecycle.

CAREER HIGHLIGHTS

- Total 10 years of IT experience, including **6+ years** as a **Full Stack Developer** and last **3 years** as a Senior **Full Stack Engineer and Tech Lead**.
- Built and scaled applications serving **15K+ active users** and engineered backend systems **handling 200K+ daily transactions**.
- Improved API response times by **approximately 28%** through database optimization, indexing, caching strategies, and efficient request handling.
- Led and mentored engineering teams, performed code reviews, and collaborated with cross-functional teams to deliver reliable production systems using Agile methodologies.
- Designed and implemented scalable backend solutions using **microservices**, REST APIs, and **AWS (EC2, ECS, S3, IAM, CloudWatch)**.
- Built and maintained **CI/CD pipelines** to automate build, testing, and deployment processes, improving release speed and reliability.
- Developed an **AI-powered Jira automation agent** to reduce repetitive engineering tasks and improve team productivity.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, Redux, TypeScript, JavaScript

Backend: Node.js, Express.js, REST APIs, Microservices Architecture, PHP (Laravel)

Mobile: React Native

Database: MySQL, MongoDB, PostgreSQL

Version Control: Git, GitHub, GitLab

Cloud & Devops: AWS (EC2, ECS, S3, IAM, CloudWatch), Docker, CI/CD

AI-Assisted Development: GitHub Copilot, ChatGPT, Codex, Gemini Code Assist, Cursor AI

CMS: WordPress (Theme & Plugin Customization)

Web Technologies: HTML, CSS, jQuery

Additional Skills: System Design, API Design, Microservices Architecture, Performance Optimization, Application Architecture, Payment Gateway Integration, Third-party Integrations

WORK EXPERIENCE

Senior Software Engineer / Team Lead (consultant) at Ulora Technologies Pvt. Ltd. | Nov 2025 – Jul 2026

- Coordinated project execution while working as a Senior Full Stack Engineer and Team Lead, managing development activities, task planning, and delivery timelines for engineering projects.
- Led a team of 3 engineers, providing technical guidance, reviewing code, resolving technical challenges, and ensuring adherence to development standards.
- Managed Agile project workflows using Jira, including sprint planning, task tracking, daily stand-ups, and progress reporting.
- Developed an AI-powered Jira automation agent to automate repetitive project management tasks, improving team productivity and reducing manual effort.
- Designed and implemented CI/CD pipelines to automate build, testing, and deployment processes, significantly reducing manual effort and release time.
- Ensure code quality through reviews, best practices, and continuous integration processes.

Senior Software Engineer at RyDOT Infotech Pvt. Ltd. | Mar 2022 – Oct 2025

- Designed and developed scalable web and mobile applications using React.js, Angular, React Native, Node.js and Express.js
- Owned the complete software development lifecycle, including requirement analysis, solution design, development, deployment, and production support.
- Led and mentored a team of developers, providing technical guidance, conducting code reviews, and resolving complex engineering challenges.
- Collaborated with product managers, designers, and QA teams to deliver reliable features within Agile development cycles.
- Improved application performance through database optimization, query tuning, indexing strategies, caching mechanisms, and efficient API design.
- Designed modular and microservices-based architectures to improve application scalability, maintainability, and deployment flexibility.
- Resolved production issues, optimized system reliability, and implemented engineering best practices for long-term application stability.
- Mentored junior developers, shared knowledge, and supported them during development and code reviews.
- **Courier ERP - Enterprise Logistics Management Platform**
 - Designed and optimized a high-performance backend system handling 200K+ requests/day for courier booking, tracking, and delivery operations.
 - Improved API performance through payload optimization, efficient request handling, database indexing, and query optimization.
 - Implemented caching strategies and database optimizations to improve reporting performance and reduce server load.

- Built real-time data synchronization using Firebase Cloud Messaging (FCM) and improved system scalability by introducing microservices architecture.
- Helped improve system performance and handle high concurrent requests efficiently
- **Radiant - Solar Monitoring System**
 - Developed a real-time solar monitoring platform for collecting, processing, and visualizing energy generation data.
 - Built APIs and dashboards to monitor system performance, improve data visibility, and support operational decision-making.
- **Digital Walls - Digital Advertisement Platform**
 - Developed a digital signage platform for managing dynamic content distribution across multiple screens.
 - Built scalable APIs for content scheduling, real-time updates, campaign management, and analytics integration.
- **Draftree - Social Media Scheduler Platform**
 - Built a social media automation platform supporting content scheduling and publishing workflows across multiple platforms.
 - Developed APIs and third-party integrations to automate publishing workflows and improve user experience.

Full Stack Developer at Repute Infosystems | Jan 2018 – Mar 2022

- Developed and maintained full-stack web applications, WordPress products, and reusable components using PHP (Laravel), React.js, Angular, JavaScript, and MySQL.
- Built and enhanced commercial WordPress plugins focused on form management, membership systems, pricing tables, and social media automation.
- Integrated multiple payment gateways, authentication workflows, role-based access control, and third-party APIs.
- Collaborated with clients and internal teams to deliver product enhancements, resolve production issues, and improve overall application performance.
- Contributed to frontend modernization by adopting React.js and Angular for interactive user interfaces.
- **Sociamonials – Social Media Scheduler**
 - Developed a full-stack social media management platform supporting multi-platform content scheduling and publishing.
 - Built campaign management, analytics dashboards, centralized media management, and role-based access control.
 - Designed REST APIs and scalable backend services to automate publishing workflows and third-party social media integrations.
 - Improved platform scalability and maintainability through modular application architecture.

- **ARForms - Form Builder Plugin**
 - Enhanced a commercial form builder plugin supporting contact, survey, login, registration, and custom forms.
 - Implemented email automation, notification workflows, and customizable templates to improve usability.
 - Optimized plugin performance and stability across diverse customer environments.
- **ARMember - Membership Management Plugin**
 - Developed features supporting subscription management, secure content access, and role-based authorization.
 - Integrated multiple payment gateways and membership workflows to support subscription-based businesses.
 - Improved plugin reliability through performance enhancements and ongoing maintenance.
- **ARPrice (Pricing Table Plugin)**
 - Developed responsive pricing table components with customizable layouts and reusable UI elements.
 - Improved frontend performance, flexibility, and cross-browser compatibility.

PHP Developer at BinaryBits | Jun 2016 – Oct 2017

- Developed and maintained web applications using PHP, JavaScript, and MySQL.
- Built automated data extraction tools to collect, process, and organize data from multiple web sources.
- Designed database schemas and optimized MySQL queries to improve application performance and data retrieval.

EDUCATION

- **MCA** from Gujarat Technological University (2019)
- **BCA** from Saurashtra University (2015)

LANGUAGES : English, Gujarati, Hindi
